

CIRS Set Up Its Agent in Turkey, Iran and Japan

21 July 2010

As the first REACH registration deadline draws closer, CIRS's services are reaching more countries through the allocation of more agents. This month, CIRS are happy to announce that NAURIN ENERGY KALA & SERVICES Co., PJS., Doruk system and JCR-Link as our new agents for Iran, Turkey and Japan respectively.

Naurin Energy Kala & Services Company is a subsidiary of the Naurin Energy Group which provides commercial & technical services to, as well as supplying equipment and material to a great variety of oil, gas and petrochemical companies. Doruk system is one of the leading Chemical Safety/risk management consultancy companies in Turkey. JCR-Link is a consulting company that offers consultation on chemical regulations over North East Asian countries. It aims to assist in business entities to improve distribution efficiency of their materials by reducing barriers produced by varying regulations over this region, and to enhance sound chemical product development by providing regulatory information at appropriate timing on new product introduction process.

As our service agents for the Turkey and Iran, these three companies will now also act as the main point of contact for information on the regulatory and chemical testing services that CIRS can provide in this region. This collaboration is also part of our efforts to help our clients comply with chemical regulations in Turkey and Japan.

As a leading provider of regulatory consulting and testing services with a strong focus on chemical compliance in the world, CIRS can deliver cost-effective solutions to allow you to comply with the relevant chemical legislation governing your exports. For more information on REACH registration and testing services or China New Chemical Notification please contact:
